

ALFA 5

Our waterproof range of ALFA 5 series floor outlet boxes which are supplied with three CAT6A connectors, are specially designed for floor applications which require plug-in power & data connections and high level of protection against water.

When in closed position, our sturdy floor outlet boxes are IP66 and IP65 rated, which ensures advanced protection from total dust ingress & high-pressure water jets from any direction.

Features a durable and non-corrosive structure to guarantee longer product life span, while the cover locking system provides the extent to endure from any pressure to protect the cable when connected.

With ease of access and a range of modules customization options, makes these floor outlet boxes ideal for indoor and outdoor use where longevity is essential.

APPLICATION:

Shopping Centers

Airports

Library

Office

Educational Centers

Terraces

Maximum resistance

When connected, the lid securing system can endure the weight of pedestrians while shielding the exiting cables from any pressure and stress.

IP65 weatherproof protection

When in closed position, IP65 seal provides almost complete protection from particles and a good level of protection against water.

Secured opening mechanism

Equipped with "slide open" mechanism to avoid accidental opening by feet.

Different types of finishes

Equipped with scratch resistant zinc alloy panel, these floor outlet boxes are available in four different finishes: Silver, Old Brass, Red Copper and Gold, which will fit in with your design seamlessly.

Choose more

Extensive range of modules option.
